

PRECISION ROLLERS

ABOUT US

Since 1988 (more than 30 years), we are into manufacturing of precision rollers. We have been serving our customers by delivering high-quality rollers on time. We provide a wide range of rollers. We have manufactured rollers for various industries such as plastic printing, paper printing, textile, and conveyor. We take care of the roller manufacturing end to end (from raw material to delivery at the client's site).

FACILITY AND MACHINERIES

Our facility is located in Kalpataru Estate in Ahmedabad. The location of the facility is very good in terms of logistics.

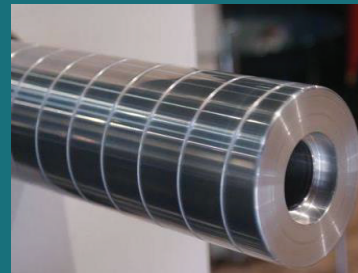

We believe delivering high-quality rollers to our clients, we have done a good amount of investments in Machines, Men, and inspection tools as shown here. Some of our machines are as follows,

- Takang Make Turning Center
- All-Gear Lathe
- Belt Drive Balancing Machine
- Grinding Machine

PRODUCT RANGE

We manufacture rollers up to 350 mm diameter and 4400 mm length. Our expertise is in manufacturing aluminum rollers. However, we provide Stainless Steel rollers and hard chrome rollers as well.
